

Job Related Information

This document includes information about the role for which you are applying and the information you will need to provide with your application.

1. Role Details

Vacancy reference	13689
Job title:	Research Assistant / Associate
Reports to:	Professor of Computer Science
Salary:	Ranging from £29,301 to £38,183
Terms and conditions:	Full time Research Staff
Grade	AC1 / AC2
Duration of post:	September 2017 to December 2018
Working hours:	37 hours per week (full time, Monday to Friday)
Location:	Milton Keynes
Closing date:	6 July 2017
Type of application form accepted:	Standard / Accessible version (plus covering letter)
Number of referees required:	Three
Unit recruitment contact:	Ortenz Rose

2. Summary of duties

We are looking for a Research Assistant or a Research Associate (depending on qualification) to work jointly on the Hub4NGI and Up2U projects. The appointment will be made on the Academic Grade 1 or 2 Salary Scales for Research Staff, ranging from £29,301 to £38,183 pa depending on qualifications and experience. Appointment as a Research Associate requires a PhD or three years equivalent in quality of achievement.

The Hub4NGI project will be strengthening and coordinating the work done by ongoing and upcoming projects focusing on Next Generation Internet Experimentation (NGI-E). The main goal of the Hub4NGI project is to transform the current NGI-E setting into an increasingly dynamic, collaborative and participatory Innovation Ecosystem capable of effectively supporting and coordinating activities across the whole NGI landscape and provide a collaborative platform, including content, tools and processes, to turn potential experimenters into NGI-E users and promoters. Hub4NGI will give a major impulse to the NGI community by providing an animated interactive platform, assisting and empowering all NGI stakeholders, including newcomers and outside players in related domains, via a rich and comprehensive set of activities, tools and processes. The selected and carefully designed services will be at the core of the Hub4NGI collaborative platform, which will improve exchange and promotion of know-how, coordination of strategic and technical activities, establishment of liaisons among NGI actors and with external players, and monitoring of NGI-E projects' progress and performance, while boosting engagement through value creation activities.

The key objective of the Up2U project is to bridge the gap between secondary schools and higher education and research by better integrating formal and informal learning scenarios and adapting both the technology and the methodology that students will most likely be facing in universities. The project will be focusing on the context of secondary schools, often referred to as high schools, which provide secondary education between the ages of 11 and 19 depending on the country, after primary school and before higher education. The learning context from the perspective of the students is the intersection of formal and informal spaces, a dynamic hybrid learning environment where synchronous activities meet in both virtual and real dimensions. For this, we propose to develop an innovative Up to University (Up2U) ecosystem – based on proven experiences in higher education and big research – that facilitates open, more effective and efficient co-design, co-creation, and use of digital content, tools and services adapted for personalized learning and teaching of high school students preparing for university. We will address project based learning and peer-to-peer learning scenarios.

JOB DESCRIPTION

In the context of Hub4NGI, the work will support the creation of the NGI ecosystem as a vibrant and disruptive framework by implementing community building strategies to effectively reach and embrace different target groups (researchers, innovators, policy makers) and players (academia, industry, SMEs, Startups) in Europe and beyond. The successful candidate will coordinate and empower marketing and communication efforts through a rich set of tools and actions that aim at creating awareness about the whole NGI flagship initiative in Europe and worldwide so as to engage the top-notch Internet Researchers and Innovators that shall contribute shaping the NGI ecosystem itself. Finally, the successful candidate will ensure participation to and organization of events to engage the identified NGI stakeholders and related Future Internet initiatives by coordinating and ensuring know-how exchange and awareness creation.

In the context of Up2U, the work will target the development of the front-end user interface to Up2U for teachers and students, i.e., the Integrated Application Toolbox. This toolbox will be web portal-based where all the tools and applications will be accessible according to the project's actor-driven methodological approach. This approach will enable the definition of a personalized, dynamic learning path with social sharing and interactions (i.e. project based and peer-to-peer learning and assessment). Internally, the application toolbox will intermediate between the cloud-based service infrastructure and the tools managed inside.

The work will also involve research on Blockchain technology and its applications on education. Blockchain is most commonly known as the technology underpinning the Bitcoin cryptocurrency. In recent years, the open source code of the Bitcoin Blockchain has been taken and extended by many groups to expand its capabilities. Blockchain technology and smart contracts can be used in education in a variety of interesting and potentially revolutionary scenarios, such as enhancing standards for badging, certification and reputation on the Web with the use of the Blockchain as a trusted ledger.

We expect successful applicants to fit into our Computer Science REF profile depending on previous experience. The REF is a UK research assessment exercise whereby research departments are evaluated for their research contribution through their publications, income generation and non-academic impact.

You will be working as part of a team of dynamic researchers in the field of knowledge technologies, Semantic Web and Web services within KMi, and in the context of a European project consortium. There will be the opportunity to develop your research profile, to travel to give demos and presentations, and to write academic papers.

3. Person specification

Requirements (E = Essential/ D = Desirable)	
<u>Education, qualifications and training</u>	
Master in Computer Science or a related field, or 2+ years of Research & Development experience in IT. Appointment as a Research Associate requires a PhD or three years equivalent in quality of achievement.	
<u>Knowledge, work and other relevant experience</u>	
Essential:	<ul style="list-style-type: none"> • Strong software and Web development skills; • Familiarity with existing Semantic Web standards and technologies, e.g. RDF(S), OWL, SPARQL; • Familiarity with eBook formats, such as Apple iBooks and ePUB; • Experience in eLearning technologies and pedagogy.
Desirable:	<ul style="list-style-type: none"> • Experience with PHP, Java and JavaScript; • Experience in the development of technology-enhanced learning applications and widgets for Learning Management Systems and other educational platforms; • Experience in the use of technology-enhanced learning standards and specifications, such as SCORM and IMS LTI; • Experience in the design and implementation of practical Semantic Web-based or ontology-driven applications; • Familiarity with Blockchain technology; • Experience working in (higher) education.
<u>Personal abilities and qualities</u>	
Essential:	<ul style="list-style-type: none"> • Proven ability to fit into the OU's Computer Science REF profile (depending on level and experience: publications, supporting income generation and non-academic impact); • Ability to quickly demonstrate understanding of the project aims and specific tasks as requested; • Self-starter in providing solutions to meet project needs; • Ability to work in complex team relationships; • Excellent written and oral communication skills; • Work to challenging targets and deadlines; • Ability to handle constructive feedback.
Desirable:	n/a

4. Role specific requirements e.g. Shift working

n/a

5. About the unit/department

The Knowledge Media Institute (KMi) of the UK's Open University is a highly successful interdisciplinary research centre founded at The Open University in 1995, and located in attractive premises at The Open University's main campus in Milton Keynes, UK. We offer a stimulating environment, widely acknowledged to be at the leading edge of research and development, particularly in Semantic Technologies, Human Computer Interaction, New Media and Information Retrieval. The style, impact and content of our work can be seen at <http://kmi.open.ac.uk/>

6. How to obtain more information about the role or application process

If you would like to discuss the particulars of this role before making an application please contact Professor John Domingue on +44 (0)1908 653800 or email: john.domingue@open.ac.uk

If you have any questions regarding the application process please contact Ortenz Rose on +44 (0)1908 654774 or email: ortenz.rose@open.ac.uk

7. The application process and where to send completed applications

Please ensure that your application reaches the University by:	6 July 2017
Post it to:	Ortenz Rose
Name/Job title:	KMi Senior Co-ordinator - Staffing & Recruitment
Department/Unit:	STEM, The Knowledge Media Institute
Address:	The Open University, Walton Hall, MILTON KEYNES. Bucks
Post Code:	MK7 6AA
Or e-mail your application to:	kmi-recruitment@open.ac.uk

8. Selection process and date of interview

The interview panel will be chaired by:	Professor John Domingue
The other members of the interview panel will be:	Dr Allan Third Dr Alexander Mikroyannidis
The interviews will take place on:	To be advised

The selection process for this post will include...

...a review of applications by the Chair and selected members of the interview panel.

- a) Please ensure you complete all relevant sections of the application form. You are encouraged to also include a curriculum vitae; however **any CV submitted without a completed application for employment form will not be accepted.**
- b) You are also asked to provide a covering letter describing how your skills make you a suitable candidate for the post.

We will let you know as soon as possible after the closing date whether you have been shortlisted for interview. Further details on the selection process will also be sent to shortlisted candidates.

Applications received after the closing date will not be accepted.
